# INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP03/17001

## Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The inventions as set forth in Claims 1-24, 31, 33, 34, and 37 have such a common technical feature that the insert/extract part of a thin display part can be inserted and extracted into and from an insert hole in a stand column part.

The inventions as set forth in Claims 25-30, 33, and 34 have such a common technical feature as a thin display part having an engagement part engageable with a projected part projected from wall surface.  
(continued to extra sheet)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
  
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
  
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.  
☐ No protest accompanied the payment of additional search fees.

Continuation of Box No. II of continuation of first sheet(1)

The inventions as set forth in Claims 32-34 have such a common technical feature that a rotating stand part is installed at the rear of a thin display part.

The inventions as set forth in Claims 35 and 36 have such a common technical feature that a remote controller holder is installed.

As a result, these four inventions have different technical features, and do not fulfill the requirement of unity of invention.
